

Peter Mitchell

Senior Software Developer at Apple Inc.

Summary

N/A

Experience

Senior Software Developer at Apple

April 2015 - Present

Senior Software Developer (Contractor) at Apple

January 2014 - April 2015 (1 year 3 months)

Developer/Consultant

May 2013 - January 2014 (8 months)

Web application consulting/development

Developer at Ultraviolet Design Limited

August 2011 - May 2013 (1 year 9 months)

UVd is a small and agile digital agency based in the heart of London's 'tech city'. My primary role involved developing web & mobile applications, including maintaining and specifying infrastructure (AWS/linux based servers) and deployment. During my time I worked on projects for large corporations, SMEs and startups.

As part of a small team I was able to help develop UVd's technical strategy/toolset - we adopted a behaviour driven development workflow, and significantly streamlined our deployment processes thanks to tools like chef/capistrano.

UK BiotechNet co-ordinator at BioPartner

August 2010 - June 2011 (10 months)

Developer for the UK Biotechnet platform (project management, events and messaging).

Helped coordinate and run networking events and managed the Biotechnet LinkedIn group

Education

University of Nottingham

MSc, Cancer Immunology and Biotechnology, 2010 - 2011

University of Southampton

BSc (hons), Biomedical Science, 2005 - 2008
