Ossama Alami

Head of Developer Programs Engineering, Google Cloud Platform

Summary

I'm an engineer and engineering manager with a passion for building great products. I've built effective teams and have grown them into successful engineering organizations. I'm an occasional product evangelist and speaker capable of handling large audiences and press. I've won key partnerships and bridged internal and external teams to get things done.

Experience

Head of Developer Programs Engineering, Google Cloud Platform at Google
February 2015 - Present

VP of Developer Happiness at Firebase
April 2014 - February 2015 (10 months)

I lead Developer Relations, Developer Support and Developer Marketing teams at Firebase
Firebase was acquired by Google in October 2014

Head of Glass Developer Relations at Google
March 2008 - April 2014 (6 years 1 month)

I lead global developer outreach and support efforts for the Google Glass platform. Developer Relations is a team of software engineers supporting the Google developer platform. This includes platform and API design, building samples and reference implementations, representing Google engineering externally and supporting both strategic partners as well as the developer community at large. After success as an individual contributor on Ads and Android, I went on to lead the Developer Relations teams for Glass, Chromecast, Geo/Maps and Commerce.

Senior Consultant at Accenture
March 2005 - March 2008 (3 years)

Accenture Capital Markets Solutions Group
Lead front-end design and development of an order and execution management system for one of the worlds largest investment management firms. This system is used to trade hundreds of millions of dollars worth of securities a day. This and other projects have included project management, technical architect, technical lead, design, development (Java, C#), testing, research and consulting in the financial services industry.

Senior Consultant (Senior Software Engineer) at Random Walk Computing
March 2005 - July 2006 (1 year 4 months)

Random Walk Computing was a small consulting startup specializing in custom software development for the financial services industry. It was acquired by Accenture in 2006.

Software Engineer at C.S.C.

June 2001 - December 2004 (3 years 6 months)

Design and development of Java web applications for government agencies, including design and architecture decisions, technical leadership, development, testing, documentation, configuration and maintenance of servers and development tools. Successfully deployed applications for the US Environmental Protection Agency, US Internal Revenue Service and the US Air Force

Programmer at Oracle Corporation

June 2000 - March 2001 (9 months)

Education

George Mason University

Bachelor of Science, Computer Science, 2001 - 2004
