Sam Day

Senior Developer at Atlassian

Summary

N/A

Experience

Senior Software Developer
December 2014 - Present

Full-stack Developer at Atlassian
September 2013 - December 2014 (1 year 3 months)

Intermediate Software Developer at Wotif Group
September 2011 - August 2013 (1 year 11 months)

Working in the ANZ Brands team, I am actively involved in maintaining and further developing the front-end for the main wotif.com site.

As a "hybrid" developer, I am responsible for working on both the back-end and front-end, so on any given day I'll go from working on the Java/Spring/Groovy/Grails stack powering the site to tweaking and developing the JS/CSS/HTML that presents it. Sometimes these transitions can be jarring, but it does mean I always get to work on something interesting and exciting.

Web Developer at Sauce Software
September 2009 - September 2011 (2 years)
